Spring common wheat : description of accessions according to their resistance to aluminum toxicity of acidic soils / I. A. Kosareva, E. V. Semenova, N. D. Kravchuk, A. N. Brykova, E. Yu. Kudryavtseva, E. V. Zuev ; E. V. Zuev (sci. ed.) ; N.I. Vavilov All-Russian Institute of Plant Genetic Resources. – St. Petersburg : VIR, 2022. – 44 p. – (Catalogue of the VIR global collection of VIR ; issue 938).

ISBN 978-5-907145-86-3

The catalogue presents the results of a twenty-year assessment of the aluminum resistance of spring common wheat from the VIR collection. During this period, 1258 accessions from 58 countries were evaluated. One hundred and thirteen sources of resistance to acidic soils were identified and recommended for the use in wheat breeding programs.

The catalogue is intended for specialists in the field of physiology and plant breeding, researchers, specialists in genetic resources of grain crops, as well as farmers.
