Rules for preparation and preservation of nomenclatural standards for cultivars of vegetatively propagated crops (Woody plants) / I. G. Chukhina, L. V. Bagmet ; Yu. V. Ukhatova (sci. ed.) ; N.I. Vavilov All-Russian Institute of Plant Genetic Resources, National Center for Plant Genetic Resources. – St. Petersburg : VIR, 2026. – 24 p. – (*Guidelines for describing plant genetic resources accessions while preparing herbarium sheets for the accessions included in the National Catalogue*).

ISBN 978-5-907780-25-5

These guidelines specify the detailed algorithm of the preparation and development of nomenclatural standards for woody plant cultivars. Recommendations are offered for collecting, drying and assembling herbarium specimens, as well as for their consequent formalization as nomenclatural standards in line with the provisions of the International Code of Nomenclature for Cultivated Plants. The rules regulating registration, digitalization and preservation of nomenclatural standards in the herbarium collection are presented.

The guidelines are addressed to specialists in the field of establishment, formation, conservation, development, studying and utilization of biological (bioresource) collections, and experts in botany, plant genetics or plant breeding, as well as lecturers and students of universities and colleges specializing in biology or agriculture.

The guidelines have been prepared within the framework of the Development Program for the National Center for Plant Genetic Resources.
